11.02.24	<p>There are only 5 more school days until the end of Half term 3 and the start of the February half term holidays. Research shows that low attendance has a detrimental impact on progress and achievement. Just 1 days' absence from school every week equates to 8 weeks per Year of missed learning. Good school attendance shows future employers that you are a person who is reliable. Let's finish this half term with Zero absences over the next 5 school days and build those Attendance habits.</p> <p>#AttendanceMatters #AttendanceCountsEveryDay</p>

28.01.24	<p>With only 15 school days until the end of half term 3, it is so important that your child attends school every day. A pupil's attendance will directly affect their school achievement. Evidence shows that a pupil's progress and attainment are affected if their attendance falls below 90%. Evidence also shows Secondary school pupils who didn't achieve grade 9 to 4 in English and maths missed 10 more days on average than those who achieved grade 9 to 5. We look forward to seeing all our students in school tomorrow morning ready to learn. #AttendanceMatters #AttendToAchieve</p>
21.01.24	<p>As we step into another week, let's reflect on the significant impact that missing even a single day of school can have on a student's learning journey. Having broken attendance (1 day off every week or fortnight, on random days) means that students will miss five hours of new learning each time but will struggle to understand the work they do the following week. With only 20 school days remaining until the February half term, it's clear that maintaining consistent attendance is crucial. 🏆 Let's inspire our students to</p>

	<p>approach the week with determination and commitment, ensuring that they are present and actively engaged in their learning. 🏠¹⁰⁰ #MondayMotivation #AttendanceMatters #AttendToAchieve ✨</p>

11.10.23	<p>Dear Parents and Carers, World Mental Health Day is a global event which takes place today on the 10th October to raise awareness and support mental health. We thought this would be a good opportunity to share the Thriving in Bury digital resource with our children and young people, as it can help them to manage any emotional well-being problems they are experiencing. The digital resource provides easy access to information on local support services, youth groups, emotional concerns and issues, national helplines, and digital mental health support. The link to the resource is here: Thriving in Bury for Children and Young People (padlet.com) I have also attached a PPT to this email which has more information about Thriving in Bury and how the service supports local young people with their emotional well-being. Additionally, there are a range of ways in which we offer support in school:</p> <ul style="list-style-type: none"> • School counselling service CAMHS referrals Social, emotional, and mental health assessments and interventions. • Adaptations for students who are experiencing difficulties with their emotional well-being Schemes of learning for all year groups on mental health in PSHE
